

Name: _____ Period: _____ Date: _____

SCORING

Core score: 20 points. Items 1-8 are 1 point each. Items 9-12 are 3 points each. Record the optional challenge separately.

#	Answer and work	Instructional evidence
1	0.086, 0.608, 0.68, 0.806	1 point. Decimal comparison and ordering; 6.NS.7 / prerequisite 5.NBT.3b.
2	2.46	1 point. Scale is 0.02 per interval; number-line reasoning.
3	4.267	1 point. Add decimals by place value; 6.NS.3.
4	4.614	1 point. Subtract decimals by place value; 6.NS.3.
5	4	1 point. Decimal multiplication; 6.NS.3.
6	0.24	1 point. Magnitude and decimal multiplication; 6.NS.3.
7	1,004	1 point. Multi-digit whole-number division with zero placeholder; 6.NS.2.
8	42	1 point. Decimal division using an equivalent whole divisor; 6.NS.3.

Name: _____ Period: _____ Date: _____

#	Answer and work	Instructional evidence
9	Align decimal points: $3.800 + 0.467 = 4.267$.	3 points. Error analysis, place value, and correction; 6.NS.3.
10	Estimate about 16 m ² ; exact area 16 m ² .	3 points. Decimal multiplication in an area context; 6.NS.3 and 6.G.1.
11	7 buses. $173 \div 28 = 6$ R5, and one more bus is required.	3 points. Whole-number division and remainder interpretation; 6.NS.2.
12	Yes. Both numbers are multiplied by 10; both quotients are 21.	3 points. Equivalent quotients and decimal division justification; 6.NS.3.

Items 9-12 rubric

3 points: correct setup or representation, accurate computation, and a clear explanation with units or contextual interpretation. 2 points: one element is incomplete. 1 point: meaningful progress. 0 points: no relevant evidence.

Optional challenge

Answers vary. Require a coherent context, two correct decimal operations, a labeled answer, and a valid second-method verification. Record challenge points separately from the 20-point core score.
